

Design a Menu

Due to the economy and inflation, your favorite restaurant had to raise its prices. All of the prices on the menu increased. Design a new menu reflecting the price increase. Pick a theme for your restaurant and use the theme to creatively decorate your menu. You may add catchy names to the food items to reflect your theme (e.g. if your theme is space, use names such as Galactic Burger or Crazy Comet Salad). Your menu must include all the items below with their new price. You must show your work on the back of the menu.
